

Guidelines for a SoftwareX submission:

Submissions to SoftwareX are made through the [Elsevier Editorial System](#). In this document you will find a few simple instructions for a correct submission. Please, keep in mind the core philosophy of the journal: the actual publication is the code/software itself. The manuscript you submit must be regarded as a brief accompanying note.

Instructions for submission:

1. The submission website for SoftwareX is located at: <http://ees.elsevier.com/softx>. You may need to establish a new user account, and later can consolidate it with any prior Elsevier user accounts.
2. Every manuscript submitted must comply with the SoftwareX article template. You will find both a Word and a Latex template in this guideline package. Choose the one you prefer and fill in the various sections, without altering any format settings.
3. If you are submitting an unpublished code/software for the first time, it is important that you select **“Original Software Publication”** when you reach the “Article Type” step in the submission process. If you are submitting an update to a code or software previously published on SoftwareX, please choose **“Software Update”** as “Article Type”.
4. The manuscript must be submitted in single column. The following constraints apply:
Word count: max. 3000.
 - a. Excluding: title, authors, affiliations, references, metadata tables.
 - b. Including: abstract, running text, captions, footnotes.
 - c. Max. 6 figures.
5. The manuscript must have **line numbers**.
6. At least one of the two **mandatory metadata tables** located at the end of the article template must be filled in and included in the manuscript.
7. To **submit your code/software** you can:
 - a. Point to an external location (repository, archive, etc.) where the code is publicly available. Clearly mark the address to retrieve the code in the metadata tables included in the manuscript.
 - b. Upload it directly with your submission as a .zip archive in the field “Zip file containing the software”.
8. Your code/software must follow under one of the licenses here below:

Apache License, 2.0 (Apache-2.0)

BSD 3-Clause "New" or "Revised" license (BSD-3-Clause)
BSD 3-Clause "Simplified" or "FreeBSD" license (BSD-2-Clause)
GNU General Public License (GPL)
GNU Library or "Lesser" General Public License (LGPL)
MIT license (MIT)
Mozilla Public License 2.0 (MPL-2.0)
Common Development and Distribution License (CDDL-1.0)
Eclipse Public License (EPL-1.0)
Creative Commons Zero (CC0)

See more at: <http://www.elsevier.com/about/content-innovation/original-software-publications#overview>.

9. Any additional material that you consider relevant to your submission can be uploaded and submitted either as "Supplementary Material" or "Supplementary data".

Microsoft Word submission:

1. Use the template SoftwareX_article_template.docx to create your manuscript.
2. Upload directly the .docx file of your manuscript on EES in the field "**Manuscript (Word or PDF file)".
3. Figures must be directly embedded in the .docx file.

Latex submission:

1. Use the template SoftwareX_article_template.tex to create your manuscript.
2. Upload the PDF file of your manuscript in the field "**Manuscript (Word or PDF file)" and provide the complete set of source files (.tex, figures, bibliography) as a .zip archive in the field "Zip file containing Latex source files".
3. Should you need any additional style file for compilation, please visit our Latex instructions page: <http://www.elsevier.com/author-schemas/latex-instructions> or send us an email at the address below.

For any questions or comments, please contact us at:
softwarex@elsevier.com.

We look forward to receiving your submission and thank you for your contribution.
